Antonio is the assistant manager of an appliance store. The store sells kitchen and home appliances, such as refrigerators, stoves, and washing machines.

Antonio has a long day. He gets up at seven o'clock. He takes a shower and gets dressed for work. Antonio arrives at work at nine o'clock and gets a cup of coffee. At nine thirty, he sits at his desk. He answers emails and calls customers about their orders. Antonio opens the store at ten o'clock.

Antonio is a very good assistant manager. He's friendly, polite, and helpful. The salespeople like him because he knows everything about each appliance. If a salesperson cannot answer a customer's question, they can ask Antonio, and he can help.

Antonio has a late lunch. He eats at two o'clock. At three o'clock, he completes his paperwork. It takes him one hour to do it. He speaks to his manager at four o'clock.

The store closes at seven o'clock. Antonio locks the door and goes home. He gets home at seven thirty. He cooks dinner. Then, he sits in his favorite chair and watches TV. He goes to bed at eleven o'clock.

A Busy Schedule

My name is Sandra. My husband, Adam and I are working parents with three children. I am a nurse, and I work part time at the hospital. I work in the emergency room on Friday, Saturday, and Sunday nights. My husband is a science teacher, and he works full time.

During the week, I'm very busy. My husband and the kids get up at six thirty. We have breakfast, and the kids are in the car by seven thirty. I drive them all to school. After school, the girls walk home. My son, Kevin, stays after school because he is on the soccer team.

I clean the house, do laundry, and prepare dinner. Three days a week, I go to the gym. On Mondays, I drive Sara to her guitar lessons. On Tuesdays and Thursdays, I drive Amy to her math tutor. At six thirty, we eat dinner together. Then, the children do the dishes.

On Saturday, Sunday, and Monday, my husband cleans and cooks dinner. I think he's a better cook than I am!

Ugly Food

Shoppers at farmers markets or grocery stores usually choose "perfect" food. They look for fruits and vegetables that they believe are the right shape and color. Some people don't want bananas with brown spots or apples that are too small. Some people don't like tomatoes that are different shapes.

Farmers throw away a lot of their fruits and vegetables because they aren't "perfect." Stores throw away more fruits and vegetables because nobody buys them. The reason is simple: farmers and grocery stores think that people don't want to buy "ugly food."

The United States wastes billions of tons of fresh fruits and vegetables every year. Some people are trying to change this. They want people to know that "ugly food" and "perfect food" taste the same. "Ugly" tomatoes make good tomato sauce. "Ugly" fruits make good smoothies. "Ugly" vegetables make good soups and salads.

At some grocery stores, you can buy "ugly food" at a lower price. At some farmers markets, you can wait until the end of the day when the market is quiet and pay a lower price for the food that other people did not choose. If people buy food that is not perfect, we can stop wasting good food.
