

Delivery

The optional interview can be done face-to-face or via video-conferencing. The interviews do not need to be recorded or moderated. They should not last more than five minutes per student.

Aims

These interviews:

- allow the institution to collect additional information about their students' English.
- prompt different element(s) of speaking competence than the online speaking component.
- provide an interactive task allowing for the assessment of communicative skills.

Guidelines for carrying out the optional interview

Before the interview:

1. Make sure you are familiar with the assessment criteria.
2. Make sure you have a quiet, relaxed environment for the interviews and the student is seated comfortably.
3. Have the assessment criteria nearby so you can refer to them immediately after the test. You do not need to take notes during the interview.
4. Follow the suggested teacher script for the relevant level to ensure that all tests are similar in format and timing, and use language at the appropriate level for the student.
5. Use the level established by the Online Placement Test as a starting point for the student's level for speaking.
6. Use the sample task supplied for the level, or you can create alternative tasks using topics that will be interesting and accessible to your students, using the blank frame supplied at the end of this document.
7. Immediately before you start, look again at the assessment criteria and remind yourself of the descriptors for the level of the test you are going to use.

During the interview:

1. Once you have asked the initial question and the student has started talking, use the prompts provided as necessary and adapt them. Be sure to use language at the appropriate level to react to what the student says and attempt to create as natural a conversation as possible.
2. At lower levels you will probably need to use more of the prompt questions and also prompt the student to ask you some questions. This is so that you can assess the student's ability to initiate as well as respond.
3. You may need to give support, especially at lower levels. This could be by repeating a question, pointing to the prompt card, re-phrasing the question in easier language or even using eye contact or nodding encouragingly. You can also use gestures, especially when you want the student to ask you some questions.
4. At higher levels, the student should be able to take a more equal part in the conversation, and you should encourage that. They should be able to use interactive language such as 'what about you?' You should pick up on what they have said and encourage a natural conversation rather than just asking the prompt questions from the task.
5. The follow-up questions are designed to elicit longer responses with more detail and development. You may only have time for one question in this part.
6. If a student can't answer a question, repeat the question at a slightly slower speed and wait for a maximum of 5 seconds for a response. Then move on to another question.

After the interview

Use the **Assessment Criteria** to make a decision about the CEFR level you think is the best fit for the student. Start with the descriptors for the level of the test you have used to see if you agree that the student is at that level. Then, look at the descriptors for the criteria for the levels above and below, to check that you are satisfied with your final decision about the student's level of spoken English.
