The second edition of Outcomes is the only course that is consistently focussed on helping students achieve the real world communicative outcomes they want and need. This lexically rich course emphasises students’ need to have the conversations in English that they would in their own language.

This new edition contains more contemporary and global content, reflecting English as it is used in the world and is visible via rewritten texts and new National Geographic photos and videos. There is a strong emphasis on real and natural English usage so students can develop the English language skills necessary for the real world.

WOMAN LOSES SEAGULL COMPENSATION CASE

A Scottish woman has lost her case against a property owner for injuries she sustained as she fell trying to escape an attack by a seagull. Cathie Kelly was leaving the business centre where she works when the bird swooped down on her. As she turned on the steps to escape the attack, she stumbled. The fall resulted in injuries that required her to take two weeks’ sick leave.

Lawyers for Kelly claimed the owners of the business centre Riverside Inverclyde had been negligent in not maintaining the property sufficiently to discourage the seagulls’ presence and were seeking £30,000 in damages, of which Ms Kelly was set to receive £7,000. However, the case was dismissed on the grounds that there was insufficient evidence to prove that the gull had actually flown down from Riverside Inverclyde’s building.

Student A: read the short texts and related questions in File 35 on page 188.
Student B: read the short texts and related questions in File 36 on page 195.

Explain to your partner what you read and then discuss the questions.

Seagull attack compensation bid symptom of our scared victim culture

The failure of Cathie Kelly's claim in the now infamous seagull compensation case has to be welcomed, but we still wonder how it could ever have come to court in the first place. Ever since Stella Liebeck set an unfortunate precedent in absurd claims by winning $2.8 million dollars for spilling coffee on herself, it seems too many people go out looking for negligence where it does not exist rather than taking responsibility for their own actions.

Were the effects of these claims confined to some wasted court time, we may be less concerned, but the effects of compensation culture have infected all areas of our lives. As our List of Shame below shows, it has created a 'health and safety' culture that sees risk and danger in even the most normal activities and it's placing extra costs on businesses in the form of increased legal insurance to guard against such claims. It has wrapped businesses and institutions in red tape, which is causing innumerable when we travel and it is smothering our children. No doubt the Scottish court's decision is a step in the right direction, but this paper will continue to challenge these widespread attitudes of victimhood and campaign to see unnecessary regulations that reduce our freedoms repealed.

The List of Shame

- A survey of UK teachers found that almost half believed children were being held back by health and safety regulations.
- The same survey reported some pupils were required to wear goggles while using Blu-Tack and children had been barred from the playground because they had no hat or sunscreen.
- The UK has around 4,750 speed cameras compared to just 2,200 in France, taking millions of pounds in fines for minor violations.
- Airport safety regulations and security cost airlines £3.6 billion a year and that's not counting the cost to passengers of all the wasted bottles of liquid and other unnecessarily confiscated items.
- Manufacturers have been required to print warning signs for sufferers of nut allergies - on packets of must.
- Kids' party clown, Barney Baloney, was forced to give up using his bubble-making machine because of the cost of public liability insurance - kids could slip over, apparently.
- Management at the city council in Oldham banned its staff from wearing slip socks due to concerns about safety.
- Anglia Ruskin University banned the traditional throwing of students' mortarboards in the air on graduation for fears of the hats causing injury as they fell.
- A group of Idaho inmates filed a class-action lawsuit against eight breweries because they did not have warnings on their beer concerning the addictive nature of alcohol. They claimed it led to their alcoholism and subsequent imprisonment.
- A few_station in the south west of England has been built without the traditional ‘fireman’s pole’ to slide down because of safety fears.
